## Red Team & Offensive Security

Tel : XXXXXXXXXXXXXXXX

Email : ddarix@gmail.com

Website : <http://knx.404.mn>

Introduces to computing at age 6 with a Spectrum 48k plus. Passionate about computer security for as long as I can remember.

Specialized on **Adversary Simulation (AD)** and **Low Level Hacking** topics (Binary exploitation, malware development userland and kernel, reverse engineering, malware analysis).

As a hobby I participate in CTF (also qualifying in the top 10 worldwide) and collect industry certifications :)

## Experience

2022 – Today	<b>Intesa SanPaolo</b>	Red Team & Offensive Security

2015	<b>PA-JFP</b>	PentesterAcademy Javascript for Pentesters
2015	<b>PA-MFE</b>	PentesterAcademy Metasploit Framework Expert

## Awards & Projects

I qualified **first in the world** on the **Offensive Security Proving Grounds** and **WizardLabs** platforms. Three times **Third in the world** in **HackTheBox's global ranking**. I was in the **TOP 10 in HackinBO's CTF** in both 2017 and 2018. **Ninth globally** on the **pentestit.ru** platform. I founded the **CTF Donkeys Team** (formerly SnadoTeam) which was **first in the world** on HackTheBox. Finally, I was the **first in Italy** to achieve the **OSEP certification** of Offensive Security.

Since 2009, I have been actively participating in community projects geared toward knowledge sharing.

I have created elearning paths such as the **Pentest Mind Project**, done **mentorship** both **privately** and with projects such as **SecurityCert**. In parallel, I founded various YouTube channels, blogs and communities such as **KNXSecurity** and **Rev3rse Security** together with Andrea Menin (themiddle). I am a contributor ambassador for **Parrot OS Linux** and have authored multiple CTF writeups, such as on the **vulnhub** platform. Finally, I have collaborated with various forums, for example **Adivor**, for unlocking and modding embedded devices, such as GPS navigators.
